

Setting The Gold Standard

1240-LG Cartridge Shaft

Quick and easy bladder change for cantilevered designs.

GOLDENROD has designed the inexpensive 1240-LG Pneumatic Cartridge Shaft to be entirely maintained from the outer end and does not require removal from the winder. Simply loosen three screws, pull out the one-piece bladder cartridge and replace it in **less than two minutes**.

Designed for medium to lighter narrow web applications, the steel or aluminum bodies are uniquely mounted to the steel journals for the lowest end-to-end runout tolerance.

Forceful gripping is provided by multiple wear-resistant molded rubber pads. An optional scale on the body is available and spare bladder cartridges are always kept in stock.

The model is available with either a single journal or flange mounting normally with an air port on centerline. Choose from our standard 3" and 6" designs or advise us of your custom requirements.

Operators will love it. It's a great low-cost solution to the long-time problems inherent in competitive designs that require frequent and costly maintenance.

Contact your local **GOLDENROD** representative or call 1-800-GOLDROD (465-3763) to find out how you can benefit from the 1240-LG Cartridge Shaft (Patent Pending).

1240-LG shown with cartridges removed and the only maintenance tool you'll ever need.

GOLDENROD

Advantages of the 1240-LG Cartridge Shaft:

Extremely Quick And Easy Bladder Replacement

- Shaft never has to be removed from the machine for bladder replacement
- When the outer three set screws are loosened, the one-piece **bladder cartridge** pops out and can be replaced in **90 SECONDS!**
- A common metric Allen wrench is the only tool required

Superior Design and Construction

- Steel journals and body on 3" ; bodies can be aluminum on larger diameters with bolt-on journal
- One or two **sets of six long gripping pads**
- Single journal or flange mounted design; air port is normally on centerline
- Shaft bodies can be 3" diameter or larger

Superior Performance

- Handles **twice the torque** of competitive models
- Handles **twice the roll weight** of competitive models
- Much **lower deflection** and **lower end-to-end runout**

Low Cost

- Simple and efficient design allows us to pass manufacturing savings on to our customers
- One 3" spare bladder cartridge will cost about \$25-\$35
