

SLITTER DRIVE SHAFT

Utilizes exclusive Goldenrod
multiple-bladder design

Check these important features, too:

- Continuous locking elements – *position knives quickly and easily without tools*
- Knives held in position with compressed air – *locks all knives simultaneously*
- Runs at high speed without vibration – *dynamically balanced*
- Readily retrofits to older slitters
- Serviced easily on slitter – *no removal necessary*
- Available for all knife ID's
- Does not require rotary air connections

Model 1280-CT
Slitter Drive Shaft
is manufactured from
high quality steels, is chrome
plated, and is ground to high
precision tolerances.
