GOLDENROD

Small Diameter Air Shafts For Tape, Film, Ribbon, and Bag Making Rewinds

Goldenrod Corporation is the only manufacturer of 1" to 1.5" diameter shafts with three rows of external gripping elements at 120° to hold and center narrow and multiple cores.

The Multiple Bladder design is a major improvement over lug, leaf, or pad internal bladder shafts:

- Shaft is turned entirely from one piece of solid steel—no weak journal connections.
- One-piece design holds more weight with less deflection. Shaft can be cantilevered to unload in most cases.
- Steel-backed rubber ledges completely protect bladders.
- Expanders run the entire length of the shaft—multiple cores can be placed anywhere along the shaft.
- 15-minute bladder repairs like all Goldenrod Multiple Bladder shafts!
- Available in lengths from 20" to 100"—custom designed for your machine.
- All small diameter shaft Made in the USA.
- One year warranty: Goldenrod small diameter shafts are designed and manufactured to the same exacting tolerances as all our industry-leading Multiple Bladder shafts.
