PURE GOLD

Super HD Safety Chuck

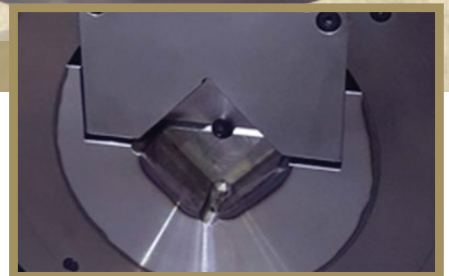

The **Super HD Safety Chucks** are made for applications with Roll or Coil weight that can be 30,000+ pounds.

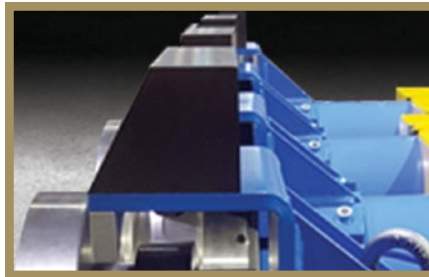

The outer ring opens/closes pneumatically with a push of a button.

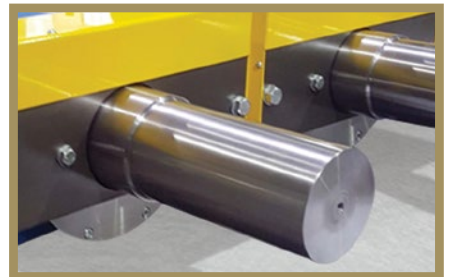

There is a proximity sensor that indicates if the chuck is OPEN or CLOSED.

Replaceable "V" sockets allow for easy loading.

This hardened "guide" works to guide the mandrel in place as the lift lowers the roll/coil mandrel down into the sockets.

Heavy duty drive shaft handles most demanding torque requirements.
